BUILDING THE FUTURE OF CONSTRUCTION - TOGETHER

The Fehmarn Region is undergoing rapid transformation driven by major infrastructure projects, new urban developments and growing cross-border activity. This creates a strong opportunity for the construction sector, public authorities and knowledge institutions to work together on shared innovation priorities.

You are invited to join a workshop where both decision-makers and subject-matter experts play an essential role. Your practical experience and technical insight are key to ensuring that the roadmap reflects the real needs and opportunities in the region.

The workshop brings together organizations from Denmark and Germany to co-create the foundation for the **Fehmarn Belt Innovation Roadmap** — a shared framework for collaboration, lighthouse projects, capability development and future joint initiatives.

Your participation ensures that your organization's perspectives, challenges and ideas are included from the start.

WORKSHOP GOALS

- Identify key regional strengths and capabilities
- Develop shared cross-border innovation themes
- Set clear goals to guide future collaboration
- Create a structure for joint projects and innovation activities
- Contribute to shaping the Fehmarn Belt Innovation Roadmap

WORKSHOP GAINS

As participant, you will gain:

- A clear picture of the Fehmarns Region today
- Insight into emerging innovation needs from peers and partners
- Practical tools for working across borders
- New DK–DE professional connections
- Influence on a shared regional roadmap

WORKSHOP PURPOSE

To co-create the strategic foundation for the Fehmarn Belt Innovation Roadmap and align Danish and German stakeholders around common innovation goals.

WORKSHOP OUTCOME

A jointly developed framework that will guide future innovation programs, partnerships and funding initiatives across the Fehmarn Belt Region.

PROGRAM
